

Session 19: Pre-class

Plagiarism: is the act of using someone's work, ideas, or words without proper acknowledgment. It can be intentional or unintentional and is considered a serious academic offense.

How to avoid Plagiarism

1. Proper Citation: Always credit the original author when using their ideas, whether quoting directly or paraphrasing.
2. Use Quotation Mark: When using exact words from a source, enclose them in quotation marks and include an in-text citation.
3. Keep track of sources: while researching, note all sources to ensure accurate referencing.
